**All Purpose Organic Potting Mix** is a general purpose media with numerous applications for indoor and outdoor use such as hanging baskets and containers. It is a favorite amongst plant lovers.

Adjusted pH combined with coarse perlite promotes aeration, drainage and assimilation of nutrients that are essential for optimum plant growth. This all purpose media is easy to use as it has been pre-moistened.

**Components:** Canadian sphagnum peat moss, coarse perlite, slow release organic fertilizer, dolomitic limestone and calcitic limestone

**Uses:** All purpose, bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, interiorscapes, whiskey barrels and window boxes

**Features:** OMRI listed for organic production, ready to use, environmentally friendly, professional grower formula, promotes roots growth and saves water

---

**All Purpose Organic Garden Soil** is ideal for adding organic matter to your vegetable and flower beds.

The organic material in this all purpose mix helps improve aeration of clay soils and increases water retention in sandy soils. The peat moss can reduce the loss of fertilizer through leaching in addition to helping to protect the soil against drying and curing.

**Components:** Canadian sphagnum peat moss, slow release organic fertilizer, dolomitic limestone and calcitic limestone

**Uses:** Vegetable gardens and flower beds

**Features:** OMRI listed for organic production, ready to use, loosens clay soils, binds sandy soils, enhances water retention & drainage, adds organic matter and saves water
