Lambert Professional Organic Potting Mix is made with the best quality Canadian sphagnum peat moss. This blend promotes plant growth and can be easily utilized straight from the bag. This special blend similar to that used by professional growers helps rapid and healthy plant growth. Lambert is using only first quality ingredients to ensure the best results.

Components: Canadian sphagnum peat moss professional grade, coarse perlite, slow release organic fertilizer, dolomitic limestone and calcitic limestone
Uses: All purpose, bedding plants, flowering plants, hanging baskets, foliage, cuttings, seed germination, interiorscapes, whiskey barrels and window boxes
Features: Ready to use, OMRI Listed, 100% organic, easy to use, versatile and for outdoor and indoor gardening

Lambert Professional Organic Garden Soil is an ideal substrate for someone who wishes to incorporate organic matter into a flower bed or vegetable garden.

Canadian sphagnum peat moss, aside from aiding the soil from hardening and drying out too fast, helps in the prevention of nutrients from leaching, especially in sandy soils.

Components: Canadian sphagnum peat moss professional grade, slow release organic fertilizer, dolomitic limestone and calcitic limestone
Uses: Vegetable gardens and flower beds
Features: Ready to use, OMRI Listed, 100% organic, easy to incorporate, loosens compact soil, source of organic matter and binds sandy soils

Including a 40 days duration Organic Fertilizer
