" At Lambert family, we stand behind our products. "

A family company dedicated to horticulture for four generations.

Founded in 1928, Lambert Peat Moss Company is recognized as one of the pioneers of the peat moss industry in North America. Now led by the fourth generation of the Lambert family, the company continues to operate from its original location in Rivière-Ouelle, Québec, along the south shore of the St. Lawrence River. Over the decades, Lambert has expanded its operations to several peat bogs along the north shore and near Lac St-Jean, strengthening its capacity to supply high-quality growing media.

From its beginnings with screened and bagged peat moss, Lambert has grown into a leading manufacturer offering a wide range of professional growing mixes, retail potting soils, and premium peat moss products designed to meet the needs of both professional growers and home gardeners. Today, Lambert serves customers across North America through a strong distribution network and dedicated product representation. Our products are competitively supplied to distributors and commercial users throughout Canada, the United States, and Mexico via efficient ground transportation. To ensure reliable and timely delivery, Lambert ships directly from its production facilities as well as from its distribution center in Beloeil, near Montréal, Québec. Our reach also extends worldwide, with container shipments exported to South America, the Caribbean, Asia, the Middle East and Europe.

Built on rigorous quality control, strong technical expertise and decades of industry knowledge, Lambert provides customers with dependable products and responsive service. One of the keys to our long-standing success is our ability to quickly adapt to our customers' evolving needs. This commitment, shared by the Lambert family and their dedicated team, has earned the trust and respect of the horticultural industry for more than 95 years.

Lambert, at the root of your success since 1928.

Market Segments

Lambert Peat Moss. is one of the leading horticultural producers of sphagnum peat moss and peat-based mixes in North America.

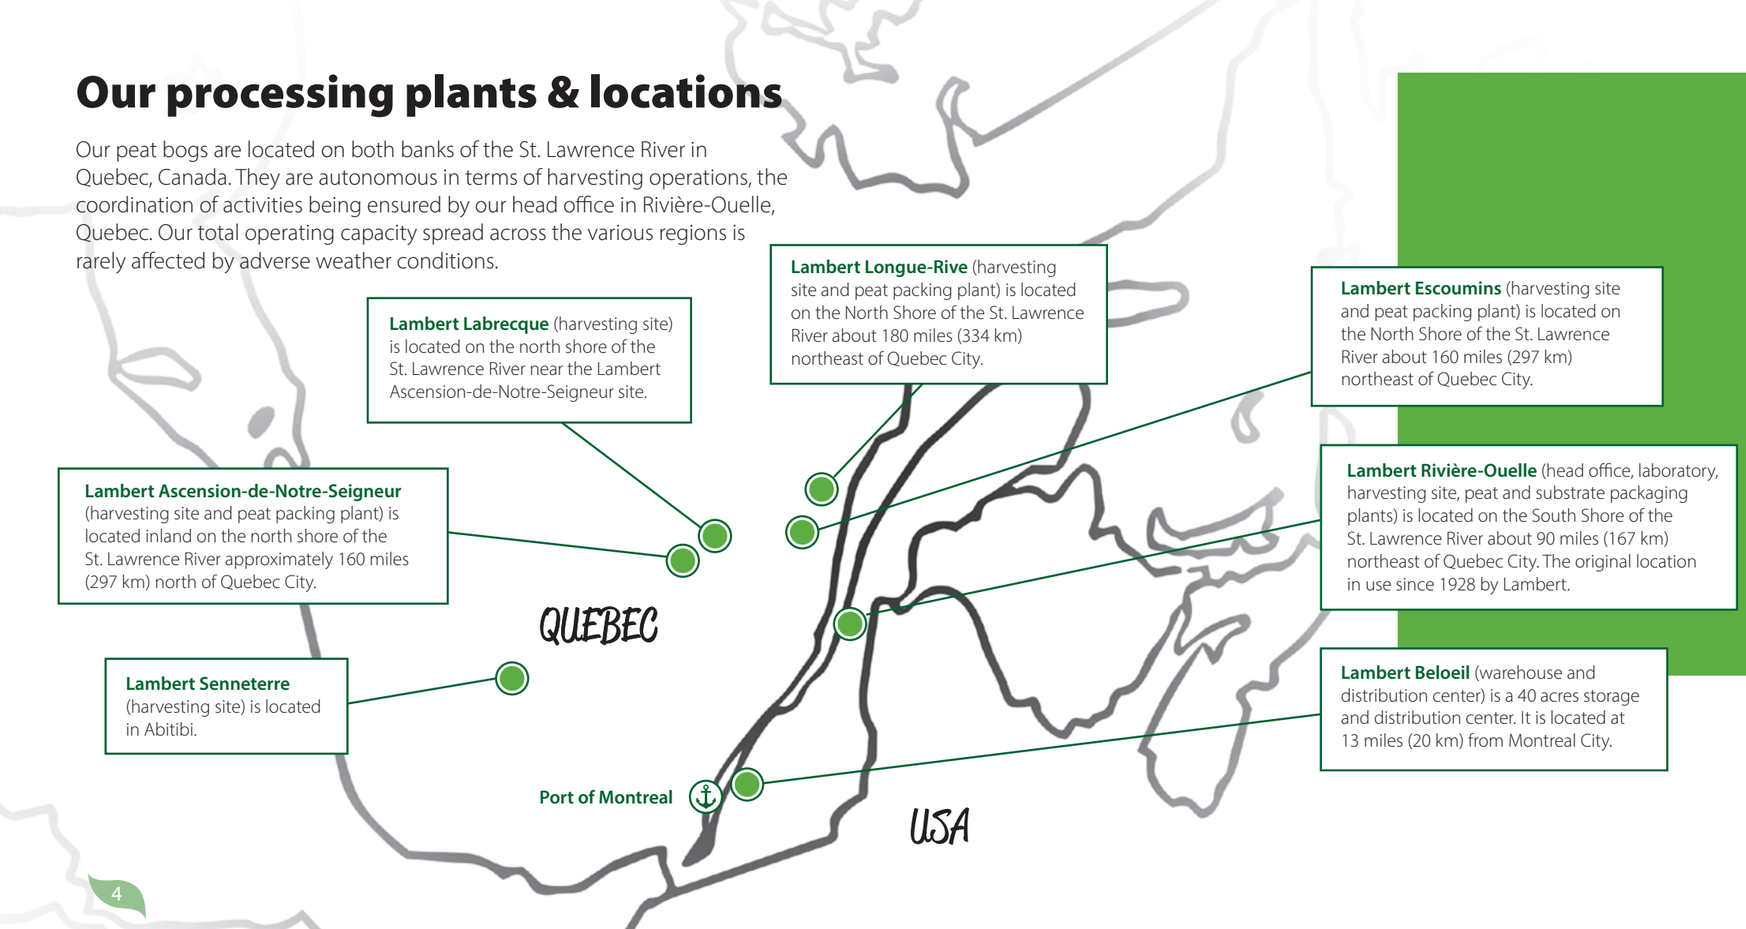

Companies trust Lambert as a reliable supplier.

- **Horticulture**
- **Environment**
- **Forestry**
- **Landscaper**
- **Agriculture**
- **Soil Manufacturing**

Our processing plants & locations

Our peat bogs are located on both banks of the St. Lawrence River in Quebec, Canada. They are autonomous in terms of harvesting operations, the coordination of activities being ensured by our head office in Rivière-Ouelle, Quebec. Our total operating capacity spread across the various regions is rarely affected by adverse weather conditions.

Lambert Labrecque (harvesting site) is located on the north shore of the St. Lawrence River near the Lambert Ascension-de-Notre-Seigneur site.

Lambert Longue-Rive (harvesting site and peat packing plant) is located on the North Shore of the St. Lawrence River about 180 miles (334 km) northeast of Quebec City.

Lambert Escoumins (harvesting site and peat packing plant) is located on the North Shore of the St. Lawrence River about 160 miles (297 km) northeast of Quebec City.

Lambert Ascension-de-Notre-Seigneur (harvesting site and peat packing plant) is located inland on the north shore of the St. Lawrence River approximately 160 miles (297 km) north of Quebec City.

Lambert Rivière-Ouelle (head office, laboratory, harvesting site, peat and substrate packaging plants) is located on the South Shore of the St. Lawrence River about 90 miles (167 km) northeast of Quebec City. The original location in use since 1928 by Lambert.

Lambert Senneterre (harvesting site) is located in Abitibi.

Lambert Beloeil (warehouse and distribution center) is a 40 acres storage and distribution center. It is located at 13 miles (20 km) from Montreal City.

Distribution Network

Lambert can supply the market at competitive prices to distributors and commercial users throughout Canada, United States and Mexico. In order to optimize our transportation system, Lambert is able to ship directly from the production plants and from our distribution center in Beloeil, near Montreal, Québec.

We also export products worldwide via container shipments to South & Central America, the Caribbean, Asia, Middle East, and Europe.

We export to more than 65 countries.

Thanks to its extensive, efficient and versatile distribution network, Lambert can quickly ship its products around the world.

Innovate to cultivate better

Lambert Laboratory

Quality has always been a priority at Lambert, that's why the company owns a complete quality control laboratory. The laboratory staff developed standards and procedures to make sure that every cubic foot of product that leaves our yard totaly complies with our standards.

Quality control procedures are also developed regularly to increase the quality of our products. Procedures can be divided into three areas: chemical, physical and packaging. To comply with chemical standards, our products are sampled and analyzed for pH, EC and S.M.E. nutrient content. To assure that physical standards are respected, we analyze particle size distribution, porosity and moisture content. Also, we regularly measure the yield and the firmness of our bags. Finally we run random greenhouse tests in order to evaluate our products' performances. Therefore, a product that does not conform to one or the other of our tested parameters stays in our yard.

« Quality First... A priority at Lambert. »

Research and Development

Innovation and improvement play an important role in Lambert laboratories. In order to be able to offer our valued customers the products they deserve, Lambert is constantly working on its processes to condition, harvest and manufacture its sphagnum peat moss. Agronomists and engineers work together to come up with ideas and innovations that will bring our products one step closer to perfection. Whether it is to improve, create a new product or adapt an existing product, the Lambert staff runs different greenhouse trials to achieve its ultimate goal which is to offer the very best for our customers.

Technical Assistance

Our technical team, made up of experienced agronomists and soil technicians, is always ready to answer all of our customers' questions, whether it concerns peat moss or the use of our various products.

Certifications & Responsible Practices

Lambert Laboratory VeriFlora® Certified Peatland Products Certification

Lambert Peat Moss Inc. proudly holds the VeriFlora® – Certified Peatland Products certification for responsible peatland management since 2011. VeriFlora® is a sustainability certification and eco-labeling program recognized as the premium standard in the floriculture and horticulture industries. This certification program is based on ISO 9 001 and ISO 14 001 standards.

The requirements for this program involve all aspects of peat production, environmental protection and social responsibility as well as product quality. Companies that are VeriFlora® certified must meet specific criteria. An independent agency, Scientific Certification Systems* thoroughly verifies if the company meets these criteria and the company's compliancy based on the following elements:

- Responsible peatland management
- Protection and conservation of ecosystems
- Conservation of resources and energy efficiency
- Integrated waste management
- Equitable working conditions
- Community benefits
- Product quality

The Canadian peat moss industry has already undertaken steps collectively to maintain and develop the best management practices in the peatland sector and the peat industry. This certification program for responsible peatland management is the most important standard and compliancy to this program guarantees a firm commitment to ongoing improvement in the production of substrates for horticultural growth.

*SCS is an international leader in third-party certification, validation, and verification for environmental, sustainability, and food safety and quality performance claims. www.scscertified.com

Organic Materials Review Institute

OMRI (Organic Materials Review Institute) is a non-profit organization that evaluates products and materials for their suitability in producing, processing, and handling organic foods and fibers. OMRI evaluates the component materials in fertilizers, insecticides, fungicides, bactericides and other growing and processing aids.

Built Around Your Growing Goals

Options to customize your growing media.
Special crops need custom blend formulations.

Lambert Peat Moss offers the possibility to customize all its "Standard" Professional substrates and also provides the option to custom blend just about any formulations that meet the needs of the producers. Adjusted pH high or low, special fertilizer and starter charge fertilizer, wetting agents (conventional or organic), various aggregates, different type of peat size, Roothshield®, mycorrhizae, absorbent polymers, including "organic additives".

Personalize your professional sphagnum peat moss

Please note that if you want your sphagnum peat moss at a specific pH, Lambert can adjust the pH on all our professional sphagnum peat moss grades: **super fine, fine, medium, coarse.**

Lambert's Custom Blend Options for your Substrates

- **Boreal Blend - Refined Ecopeat+**
- Bark
- Bentonite Clay
- Biofungicide
- Coconut Coir
- Compost (Available in Canada only)
- Controlled Release Fertilizer
- EcoPeatPlus+®
- Gypsum
- Humic Acid
- WoodFiber
- Kelp Meal
- K-Mag®
- Micronutrients
- Mycorrhizae
- Organic Slow Release Fertilizer
- Organic Wetting AgentPerFect Amendment™
- Seaweed Liquid Extract
- Special pH
- Perlite
- Vermiculite
- Water Holding Polymers
- Worm Castings
- Azomite
- Biochars

Better Growing with Lambert products.

Professional Substrates

SUCCESSFUL GROWING STARTS AT THE ROOT
with Lambert Professional Substrates

Lambert Professional Substrates are developed to provide growers with the consistency, flexibility and performance they need to succeed. Carefully formulated with high-quality Canadian sphagnum peat moss, our substrates create an optimal environment for strong root development and healthy plant growth.

Understanding that every crop and production system has unique requirements, Lambert offers a wide range of professional substrates designed to adapt to different growing methods and conditions. Whether for greenhouse production, nursery crops or specialized applications, our solutions deliver perfect structure with balanced ratio of water retention and aeration.

You can rest easy knowing you are using Lambert products.

Why choose Lambert products?

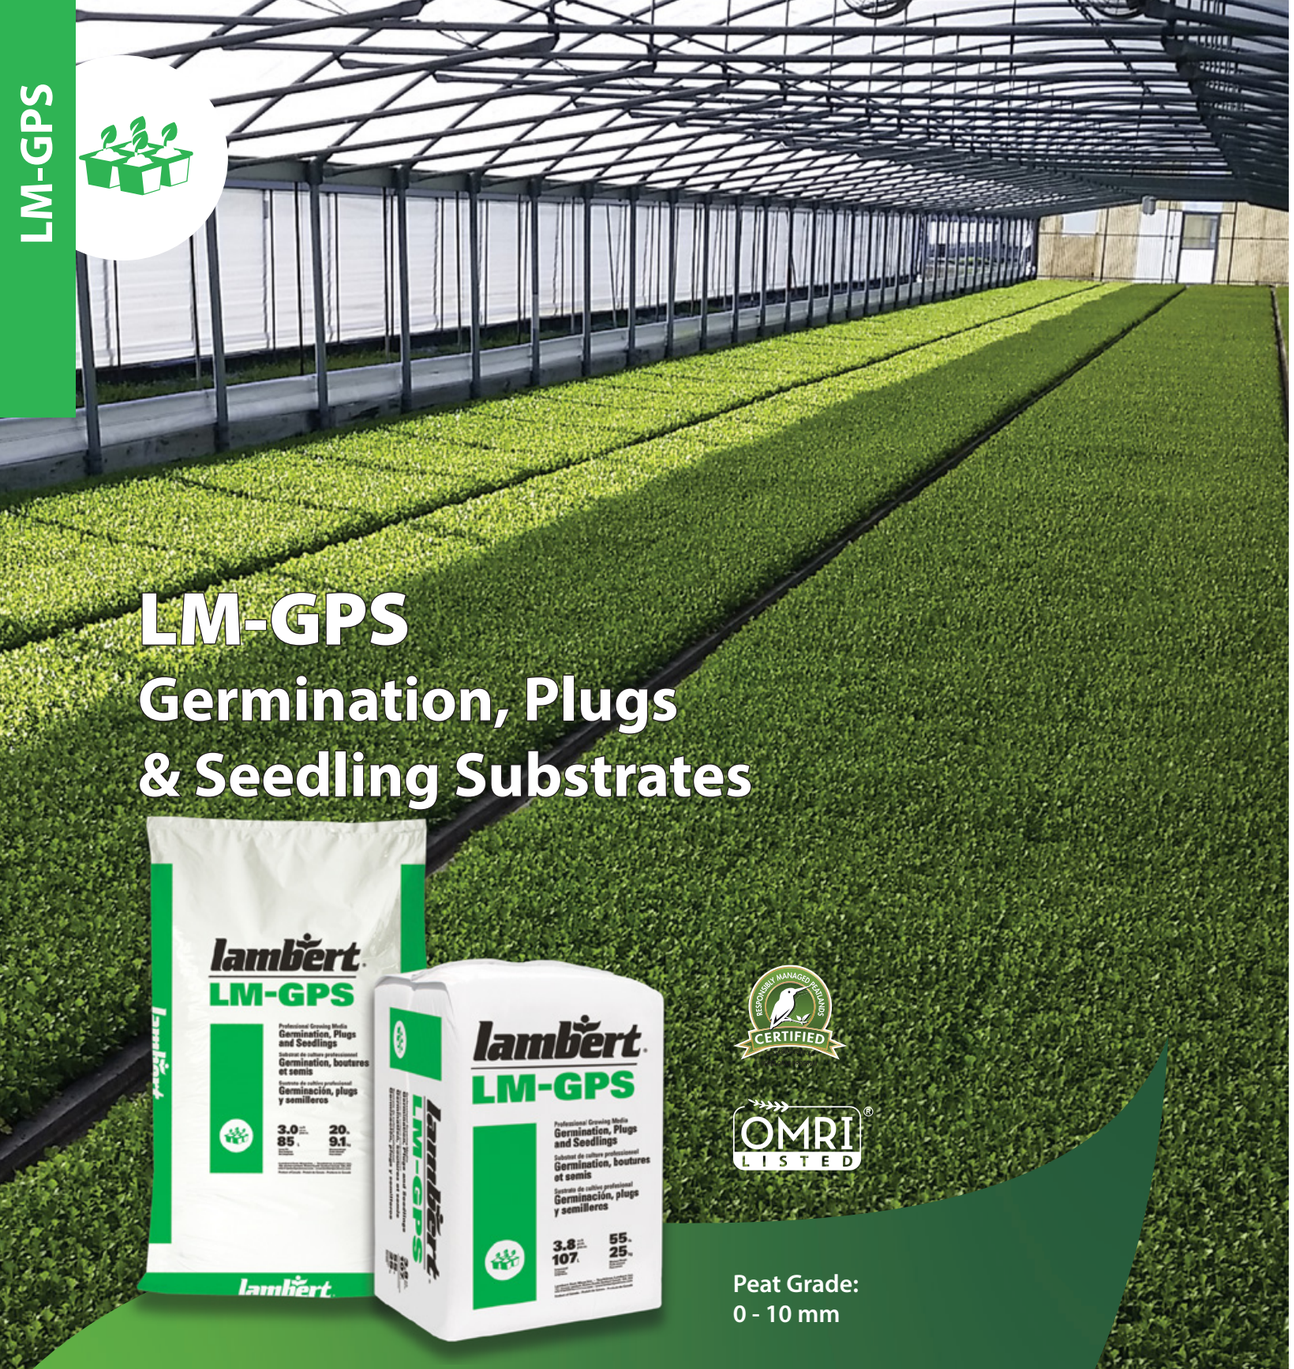

- Quality
- Consistency
- Excellent root development
- Vigorous plant growth
- Designed for optimal water retention and drainage
- Superior performance

LM-GPS
Germination, Plugs & Seedling Substrates

RESPONSIBLY MANAGED PEATLANDS CERTIFIED

OMRI LISTED

Peat Grade:
0 - 10 mm

Lambert Professional Peat-Based Substrates for Germination, Plugs and Seedlings are formulated with selected, high-quality Canadian sphagnum peat moss. Designed for the earliest stages of plant development, these substrates provide an ideal balance of water retention and air space; essential for strong root development and uniform, healthy seedlings. With a particle size optimized for small plug trays, this media ensures consistent moisture management and reliable performance throughout the propagation process.

AFM-1

AFM-1 Germination Mix is an aggregate free growing media (AFM) that is processed from selected Canadian sphagnum peat moss. The peat is screened to the proper particle size, making it ideal for seed germination. The air space in this media encourages healthy root development for vigorous plant growth.

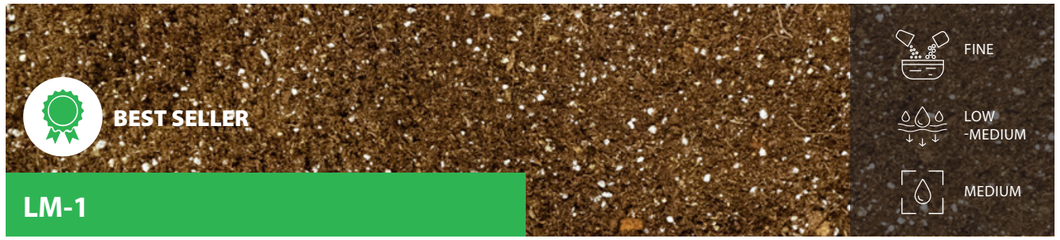

Uses: Seed germination, plugs, cutting propagation

Product Features: Aggregate free media, very economical, sub-irrigation, overhead irrigation, can be used as a base for germination, can be used as a base for substrates, adequate in hot and dry conditions

Components:
- Fine Canadian sphagnum peat moss (100%)
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Aggregate Free Media

Product Code	Size	Qty /Pallet

LM-1

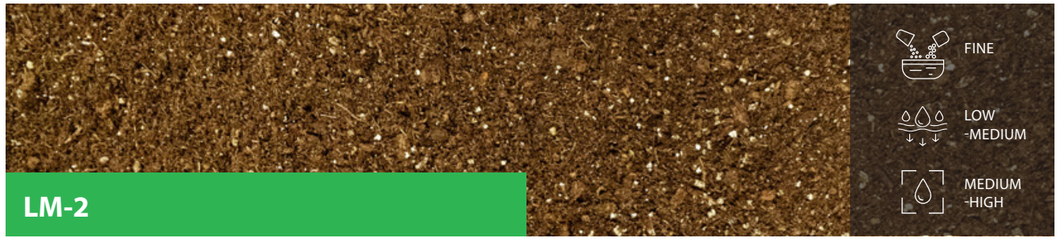

LM-1 Germination Mix is a blend of fine-fibered Canadian sphagnum peat moss along with fine vermiculite and perlite to help promote aeration and ideal water holding capacity.

Uses: Seed germination, plugs, cutting propagation

Product Features: Sub-irrigation, overhead irrigation

Components:
- Fine Canadian sphagnum peat moss (80 - 90%)
- Fine horticultural perlite
- Fine horticultural vermiculite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2313	3.0 cu ft loose fill - 85 L	48 bags
664980 2316	74 cu ft loose fill - 2095 L	2 totes

LM-2

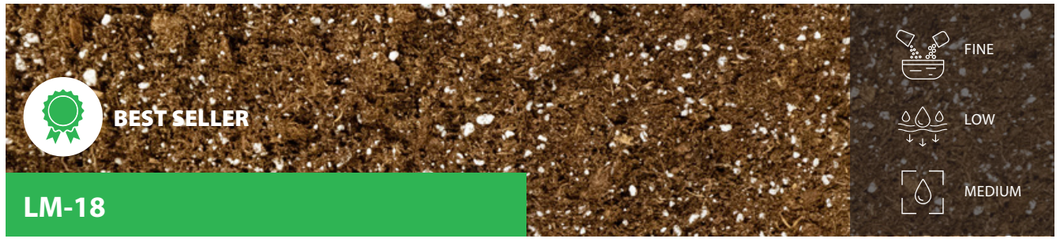

LM-2 Germination Mix is made of fine Canadian sphagnum peat moss mixed with fine vermiculite to increase water retention. LM-2 is formulated for plugs and transplants.

Uses: Seed germination, plugs, cutting propagation

Product Features: Very economical, sub-irrigation, overhead irrigation, good for hot and dry conditions

Components:
- Fine Canadian sphagnum peat moss (80 - 90%)
- Fine horticultural vermiculite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2325	3.0 cu ft loose fill - 85 L	48 bags
664980 2326	74 cu ft loose fill - 2095 L	2 totes
664980 2320	3.8 cu ft compressed - 107 L	30 bales

664980 2327	120 cu ft compressed - 3400 L	1 bale

LM-18

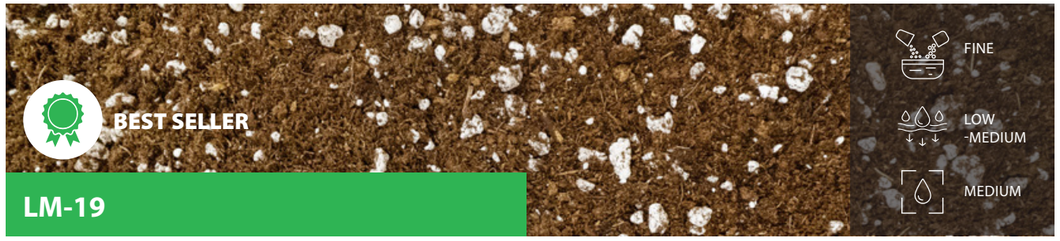

LM-18 Germination Mix is a composition of fine Canadian sphagnum peat moss and fine perlite. LM-18 is a media formulated to promote effective and uniform germination. The added amount of perlite contributes to the germination of specific seeds that require more air space providing better drainage.

Uses: Seed germination, plugs, cutting propagation

Product Features: Very grower-friendly mix, increased aeration, sub-irrigation, overhead irrigation

Components:
- Fine Canadian sphagnum peat moss (80 - 90%)
- Fine horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2505	3.0 cu ft loose fill - 85 L	48 bags

664980 2507	120 cu ft compressed - 3400 L	1 bale

LM-19

LM-19 Germination Mix is a composition of fine Canadian sphagnum peat moss and coarse perlite. LM-19 is a media formulated to promote effective and uniform seed germination like the LM-18, but for a grower used to work with coarse grade perlite. That specific amount of perlite contributes to the germination by increasing air space and drainage.

Uses: Seed germination, plugs, cutting propagation

Product Features: Increased aeration, sub-irrigation, overhead irrigation

Components:
- Fine Canadian sphagnum peat moss (75 - 85%)
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2519	3.0 cu ft loose fill - 85 L	48 bags

664980 2520	3.8 cu ft compressed - 107 L	30 bales
664980 2524	55 cu ft compressed - 1557 L	2 bales
664980 2522	110 cu ft compressed - 3116 L	1 bale
664980 2521	120 cu ft compressed - 3400 L	1 bale

BOREAL BLEND
Exclusive to Lambert

Peat Grade:
0 - 20 mm

Lambert Professional Boreal Blend are made from sphagnum peat moss and premium wood fibers. It improves porosity and drainage, not to mention its importance in sustainable development.

" At Lambert Family, we are evolving our products to take your growth to the next level. "

BOREAL BLEND #15

The new Boreal Blend #15 combines coarse-grade sphagnum peat moss with our new proprietary wood fiber, developed exclusively by Lambert and produced in our own facilities. Designed as a versatile all-purpose growing medium, it is the ideal choice for growers looking for one mix that can be used successfully across a variety of crops.

Uses: Flowers, hanging baskets, annuals, houseplants

Product Features: All-Purpose mix, good water retention ratio, good drainage

Components:
- Coarse Canadian sphagnum peat moss (80 - 90%)
- Natural wood fiber
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 1700	3.0 cu ft loose fill - 85 L	48 bags
664980 1701	74 cu ft loose fill - 2095 L	2 totes
664980 1702	3.8 cu ft compressed - 107 L	30 bales
664980 1703	55 cu ft compressed - 1557 L	2 bales

664980 1705	120 cu ft compressed - 3400 L	1 bale

BOREAL BLEND #25

The new Boreal Blend #25 is a combination of coarse peat and our new proprietary wood fiber, developed exclusively by Lambert and produced in our own facilities. It is the ideal growing mix for plants that require superior drainage and high porosity. An excellent choice for perennial production.

Uses: Nursery crops, perennials, container-grown plants, plants requiring excellent drainage

Product Features: 100% peat and wood fiber, light

Components:
- Coarse Canadian sphagnum peat moss (70 - 80%)
- Natural wood fiber
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

BOREAL BLEND

LM-AP
All Purpose Substrates

Peat Grade:
0 - 20 mm

Lambert Professional Peat-Based Substrates for All-Purpose Use are crafted from a carefully selected blend of Canadian sphagnum peat moss, combining fibrous peat with small peat chunks.

This balanced formulation ensures excellent drainage and optimal air space, creating the perfect environment for healthy root growth and vigorous plant development.

AFM-3

AFM-3 All Purpose Mix is an aggregate free growing media made up of a very coarse-fibered Canadian sphagnum peat moss that provides excellent water holding capacity. The coarseness of this media provides ideal air space with the added benefit of reduced media shrinkage.

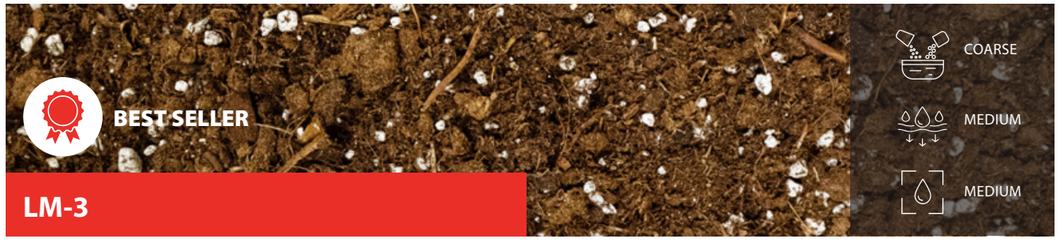

Uses: All purpose mix for flats, for pots and for hanging baskets

Product Features: Aggregate free media, very economical, subirrigation, overhead irrigation, good for hot and dry conditions

Components:
- Coarse Canadian sphagnum peat moss (100%)
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

LM-3

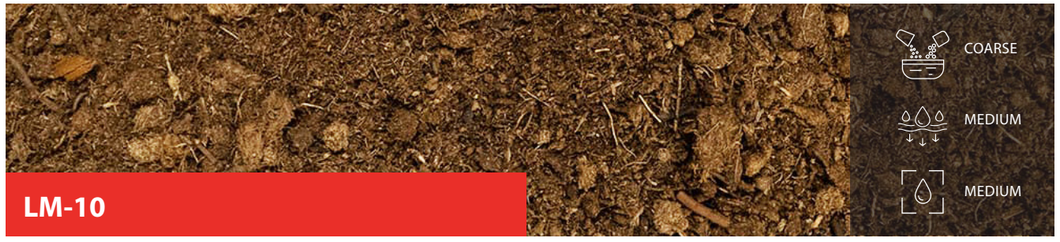

LM-3 All Purpose Mix is formulated from a blend of coarse Canadian sphagnum peat moss, coarse perlite and coarse vermiculite. This substrate is an excellent general or all purpose media. **A Lambert Classic Mix!**

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, cutting propagation, good for mums and poinsettias

Product Features: Versatile mix, medium-draining mix, production in 4" to 8" pots, production of hanging baskets

Components:
- Coarse Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite and vermiculite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet

LM-10

LM-10 All Purpose Mix is versatile and suitable for several productions. Coarse LM-10 peat fibers and peat chunks provide high aeration, good drainage, and air capacity for healthy root development. A great alternative to not amended sphagnum peat moss for growers who wish to customize their own growing medium by incorporating the aggregate of their choice.

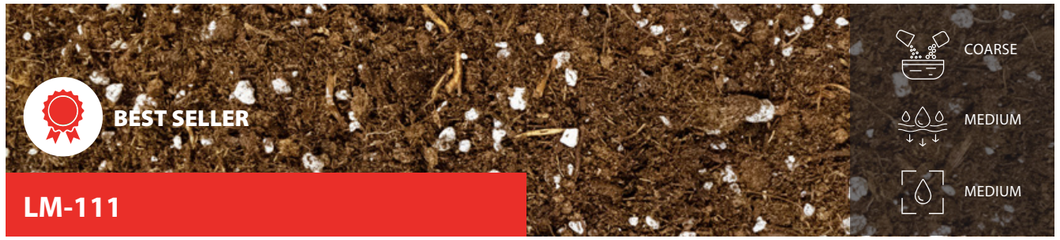

Uses: All purpose mix for flats, for pots and for hanging baskets

Product Features: Aggregate free media, very economical, subirrigation, overhead irrigation, good for hot and dry conditions

Components:
- Coarse Canadian sphagnum peat moss (100%)
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

LM-111

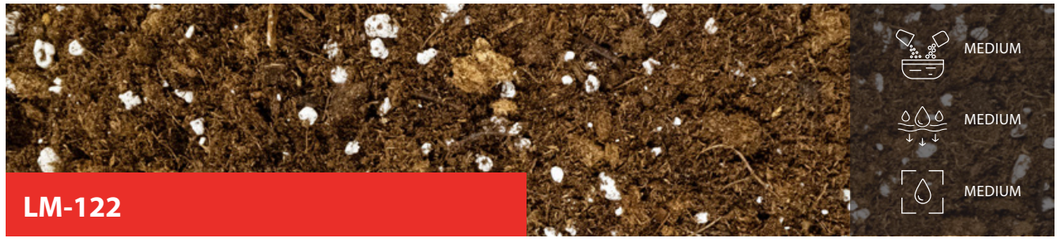

LM-111 All Purpose Mix is a blend of coarse Canadian sphagnum peat moss, peat chunks and coarse perlite. This classic and proven formulation is ideal for growers looking for a versatile product suitable for many crops.

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Coarse Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet

664980 2518	120 cu ft compressed - 3400 L	1 bale

LM-122

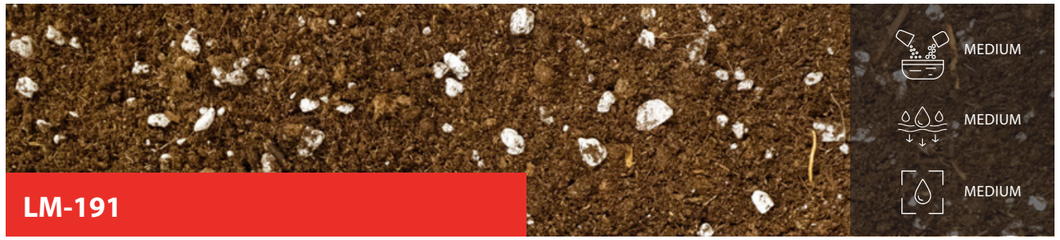

LM-122 All Purpose Mix is a blend of Canadian sphagnum peat moss with reduced amount of perlite. This media has been formulated to create a slightly less drainage than the LM-111.

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Coarse Canadian sphagnum peat moss (85 - 95%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet

664980 2694	120 cu ft compressed - 3400 L	1 bale

LM-191

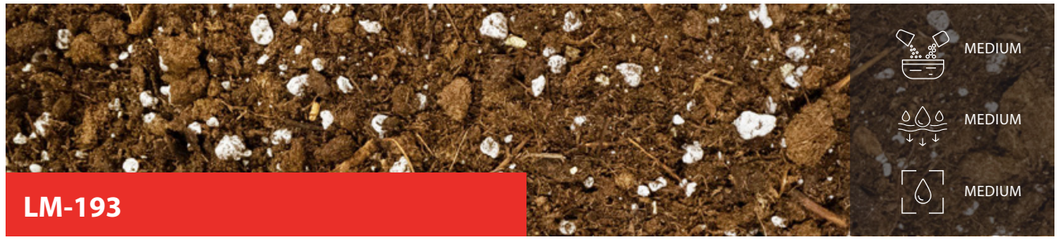

LM-191 substrate is a slightly less coarse version of our best-selling all-purpose blend, the LM-111. This new mix is blended with specially selected grade of sphagnum peat moss and coarse perlite. An additional step in the screening process of the peat was done to allow this all-purpose mix to be more widely adaptable, including the utilization in six pack, 50 and 72 cavities trays.

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation, cells packs

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Medium Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet

664980 2532	74 cu ft loose fill - 2095 L	2 totes
664980 2534	3.8 cu ft compressed - 107 L	30 bales
664980 2535	55 cu ft compressed - 1557 L	2 bales
664980 2531	110 cu ft compressed - 3116 L	1 bale
664980 2536	120 cu ft compressed - 3400 L	1 bale

LM-193

LM-193 substrate is a differently screened version of our best-selling LM-3 All Purpose mix. The additional step in the screening process of the peat was done to allow this all-purpose mix to be more widely adaptable, including the utilization in six pack, 50 and 72 cavities trays and classic standard pots as well. This new mix is blended with specially selected grade of Canadian sphagnum peat moss with coarse perlite and coarse vermiculite.

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation, cells packs

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:

- Medium Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite and vemiculite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

EPM-20

EPM-20 All Purpose Mix is a blend of coarse Canadian sphagnum peat moss, EcoPeatPlus+ and perlite. The well-balanced amount of EcoPeatPlus+ and perlite makes the ideal general-purpose mix perfect for your perennials.

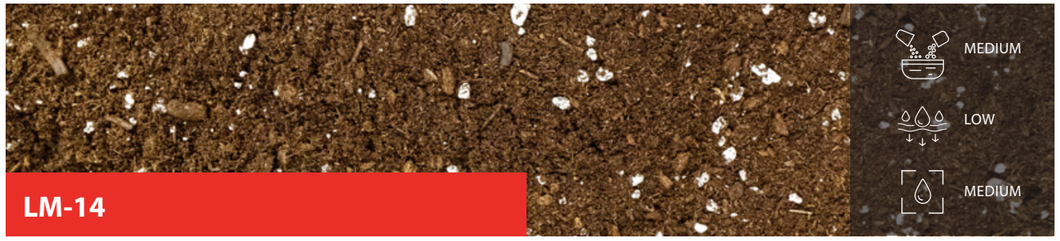

Uses: Nursery crops, bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, suitable for 4" pots and larger

Product Features: Sub-irrigation, overhead irrigation

Components:

- Coarse Canadian sphagnum peat moss (70 - 80%)
- ECOPEAT PLUS+
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

LM-14

LM-14 All Purpose Growing Media with Humus is composed of Canadian sphagnum peat moss, humus and coarse perlite. LM-14 is denser and heavier than most substrates. LM-14 is ideal for plants that requires more retention.

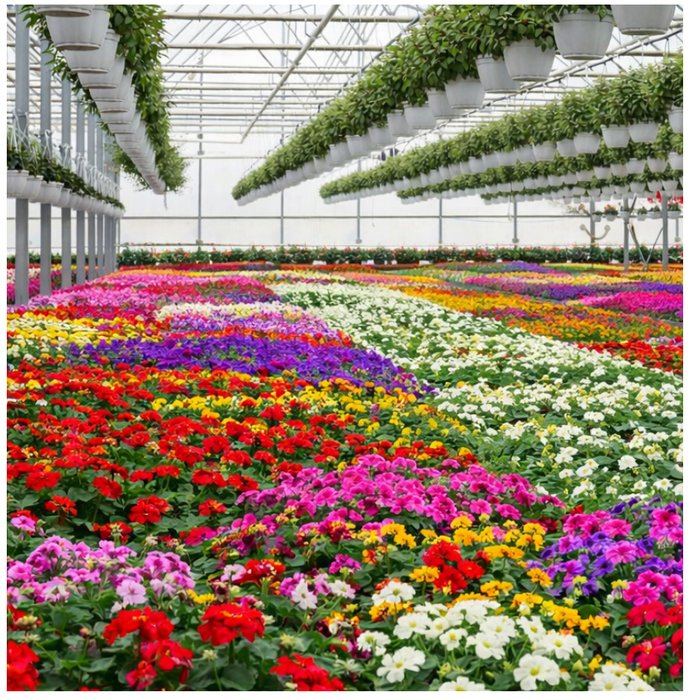

Uses: Bedding plants, hanging baskets

Product Features: Heavyweight, overhead or drip irrigation, enriched with humus, pre-moistened, ready to use

Components:

- Coarse Canadian sphagnum peat moss (70-80%)
- Coarse horticultural perlite
- Humus
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

LM-HP
High Porosity Substrates

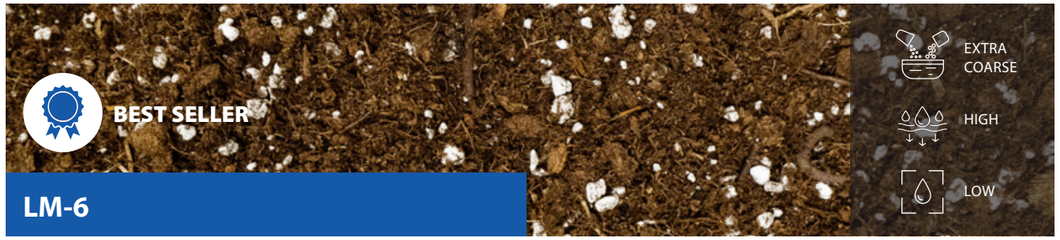

RESPONSIBLY MANAGED FERTILIZANTS CERTIFIED

OMRI LISTED

Peat Grade:
0 - 20 mm

Lambert Professional Peat-Based Substrates for High Porosity needs are formulated with our most fibrous selection of Canadian sphagnum peat moss blended with aggregates in order to achieve this specific media.

Apart from the application of this media for the production of crops that require higher drainaige and superior air capacity it is also used extensively in hanging baskets.

LM-6

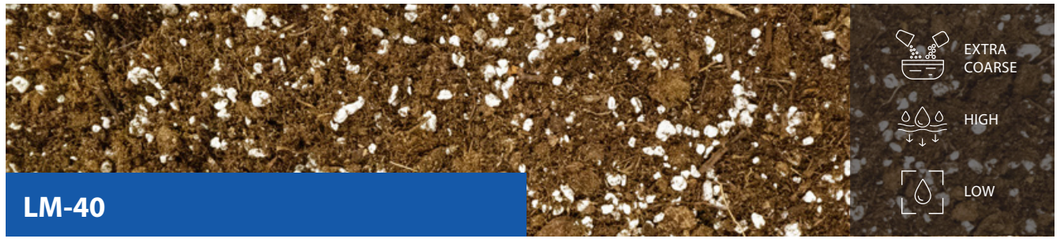

LM-6 High Porosity Mix is a high porosity growing media with long-fibered Canadian sphagnum peat moss including the addition of large peat chunks and coarse perlite. LM-6 is designed for crops that require higher air capacity and drainage. LM-6 is also recommended for the production of cactus and succulents in pots of 4 inches and less.

Uses: Bedding plants, flowering plants, foliage crops, interiorscapes, hydroponics

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Extra coarse Canadian sphagnum peat moss (75 - 85%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

LM-40

LM-40 High Porosity Mix is a high porosity growing media designed with long-fibered and coarse Canadian sphagnum peat moss including the addition of large peat chunks and coarse perlite. It is perfectly suitable for hydroponic production.

Uses: Bedding plants, flowering plants, foliage crops, interiorscapes, hydroponics

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Extra coarse Canadian sphagnum peat moss (55 - 65%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

EPM-40

EPM-40 High Porosity Mix is a blend of coarse Canadian sphagnum peat moss and EcoPeatPlus+. The great amount of EcoPeatPlus+ enhances drainage and porosity. This media is recommended for use in large container, perennials, and nursery crops. Highly recommended for mums crop.

Uses: Nursery production, bedding plants, flowering plants, foliage crops, interiorscapes, suitable for 4" pots and larger

Product Features: Increase pot stability, overhead irrigation

Components:
- Extra coarse Canadian sphagnum peat moss (55 - 65%)
- ECOPEAT PLUS+
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

EPM-55

EPM-55 High Porosity Growing Media is made of extra coarse Canadian sphagnum peat moss, EcoPeatPlus+ and coarse perlite. The large amount of EcoPeatPlus+ it contains improves drainage and porosity. EPM-55 is also recommended for the production of cactus and succulents.

Uses: Nursery production, bedding plants, flowering plants, foliage crops, interiorscapes, suitable for 4"pots and larger

Product Features: High drainage, low water retention, sprinkler irrigation, drop by drop

Components:
- Extra coarse Canadian sphagnum peat moss (40 - 50%)
- ECOPEAT PLUS+
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

LM-ORG
Natural & Organic Substrates

Lambert Professional Peat-Based Substrates for Organic productions are formulated from premium Canadian sphagnum peat moss and include carefully selected components from the best suppliers.

The Organic Material Review Institute (OMRI) supports organic integrity by providing certifiers, growers, manufacturers and suppliers an independent review of products intended for use in certified organic production, handling and processing.

AFM-1 Organic Germination Mix

Lambert LM-ORG AFM-1 Organic Germination Mix is an aggregate free growing media (AFM) that is processed from selected Canadian sphagnum peat moss. The peat is screened to the proper particle size, making it ideal for seed germination. The air space in this media encourages healthy root development for vigorous plant growth.

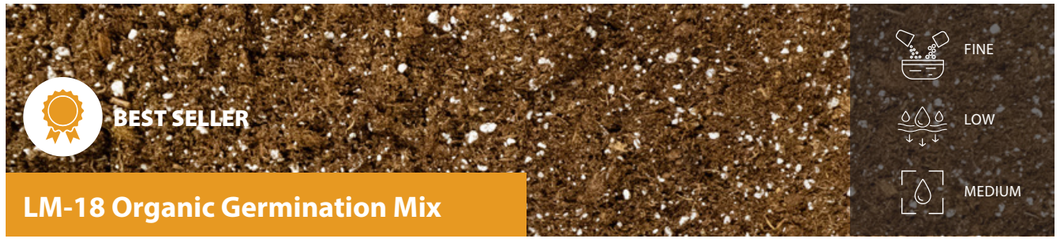

Uses: Seed germination, plugs, cutting propagation

Product Features: Organic components, OMRI Listed for organic use, aggregate free media, very economic, sub-irrigation, overhead irrigation, adequate in hot and dry conditions

Components:
- Fine Canadian sphagnum peat moss (100%)
- Calcitic limestone
- Dolomitic limestone
- Organic wetting agent

Aggregate Free Media
Peat Grade: 0 - 10 mm

Product Code	Size	Qty /Pallet
664980 1450	3.0 cu ft loose fill - 85 L	48 bags
664980 1451	74 cu ft loose fill - 2095 L	2 totes
664980 1452	3.8 cu ft compressed - 107 L	30 bales
664980 1453	55 cu ft compressed - 1557 L	2 bales

664980 1455	120 cu ft compressed - 3400 L	1 bale

LM-18 Organic Germination Mix

Lambert LM-ORG LM-18 Organic Germination Mix is a composition of premium fine Canadian sphagnum peat moss and fine perlite. This media is formulated to promote effective and uniform seed germination. The added amount of perlite contributes to create an ideal substrate for the germination by increasing air space and drainage.

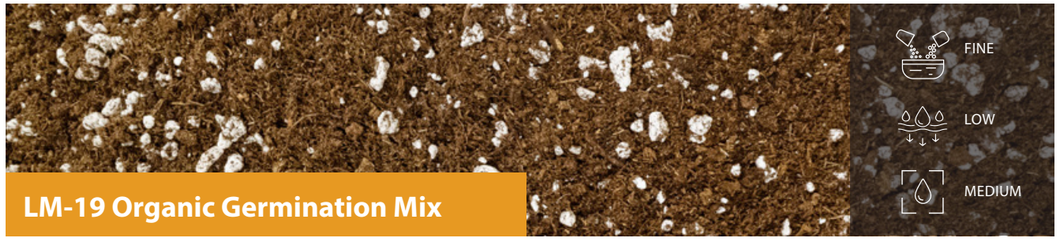

Uses: Seed germination, plugs, cutting propagation, vegetable production and fruit plant

Product Features: Organic components, OMRI Listed for organic use, increased aeration, sub-irrigation, overhead irrigation

Components:
- Fine Canadian sphagnum peat moss (80 - 90%)
- Fine horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Organic wetting agent

Peat Grade: 0 - 10 mm

Product Code	Size	Qty /Pallet

LM-19 Organic Germination Mix

Lambert LM-ORG LM-19 Organic Germination Mix is a composition of fine Canadian sphagnum peat moss and coarse perlite. LM-19 Organic is a media formulated to promote effective and uniform seed germination like the LM-18, but for a grower used to work with coarse grade perlite. That specific amount of perlite contributes to the germination by increasing air space and drainage.

Uses: Seed germination, plugs, cutting propagation, vegetable production and fruit plant

Product Features: Organic components, OMRI Listed for organic use, increased aeration, sub-irrigation, overhead irrigation

Components:
- Fine Canadian sphagnum peat moss (75 - 85%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Organic wetting agent

Peat Grade: 0 - 10 mm

664980 1510	120 cu ft compressed - 3400 L	1 bale

AFM-3 Organic All Purpose Mix

Lambert LM-ORG AFM-3 Organic All Purpose Mix is an aggregate free growing media made up of a very coarse-fibered Canadian sphagnum peat moss that provides excellent water holding capacity. The coarseness of this media provides ideal air space with the added benefit of reduced media shrinkage.

Uses: All purpose mix for flats, for pots and for hanging baskets

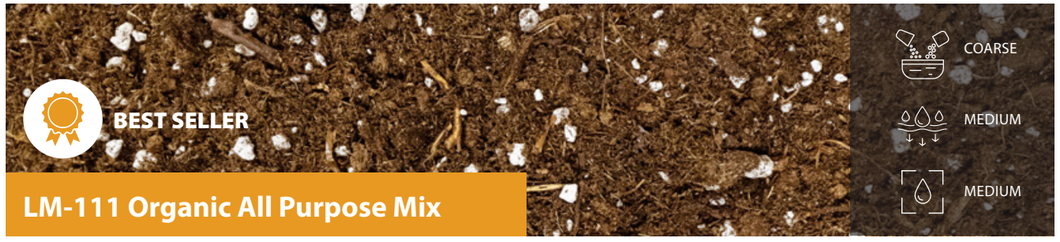

Product Features: Organic component, OMRI Listed for organic use, aggregate free media, very economical, sub-irrigation, overhead irrigation, good for hot and dry conditions

Components:
- Coarse Canadian sphagnum peat moss (100%)
- Calcitic limestone
- Dolomitic limestone
- Organic wetting agent

LM-111 Organic All Purpose Mix

Lambert LM-ORG LM-111 Organic All Purpose Mix is a blend of coarse premium Canadian sphagnum peat moss, peat chunks and coarse perlite. Ideal for plants that require good aeration and drainage.
Our Best seller in Organic available!

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and plant growths, vegetable production and fruit plant

Product Features: Organic component, OMRI Listed for organic use, lightweight, sub-irrigation, overhead irrigation

Components:
- Coarse Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Organic wetting agent

Ellepot 60-30-10 Organic Mix

Lambert LM-ORG Ellepot 60-30-10 Organic Mix is the choice when an organic mix suitable for Ellepot growing system is needed. Lambert incorporates premium grade of coconut coir to enhance the way the mix will flow in your machine.

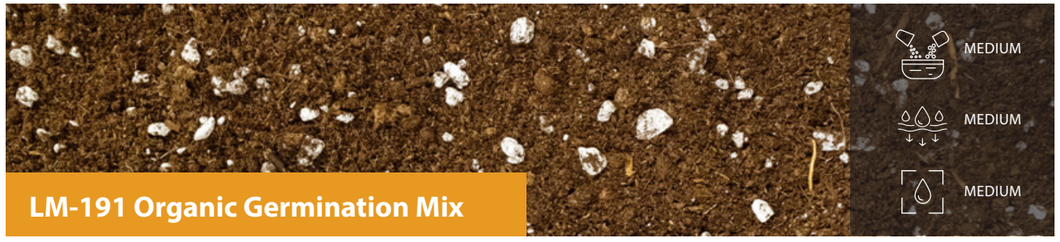

Uses: Seed germination, plugs, cutting propagation, all Ellepot sizes, vegetable production and fruit plant

Product Features: Organic component, OMRI Listed for organic use, very economical, stick-free, sub-irrigation, overhead irrigation

Components:
- Super fine Canadian sphagnum peat moss (55 - 65%)
- Coconut coir
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Organic wetting agent

Peat Grade: 0 - 7 mm

LM-191 Organic Germination Mix

Lambert Professional LM-191 organic germination Mix is a slightly less coarse version of our best-selling all-purpose blend, the LM-111. This new mix is blended with specially selected grade of sphagnum peat moss and coarse perlite. An additional step in the screening process of the peat was done to allow this all-purpose mix to be more widely adaptable, including the utilization in six pack, 50 and 72 cavities trays.

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation, cells packs, vegetable production and fruit plant

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Medium Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Peat Grade: 0 - 20 mm

LM-BK
Peat & Bark Substrates

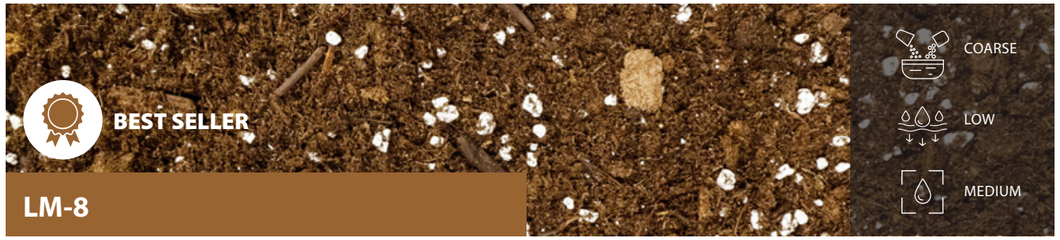

CERTIFIED

OMRI LISTED

Peat Grade:
0 - 20 mm

Lambert Professional Peat-Bark Substrates combine carefully selected Canadian sphagnum peat moss with high-quality aged bark, creating a well-balanced medium for vigorous plant growth.

Ideal for growers using large containers or outdoor production, this substrate offers excellent drainage, optimal aeration, and a reliable foundation for healthy, robust plants.

LM-8

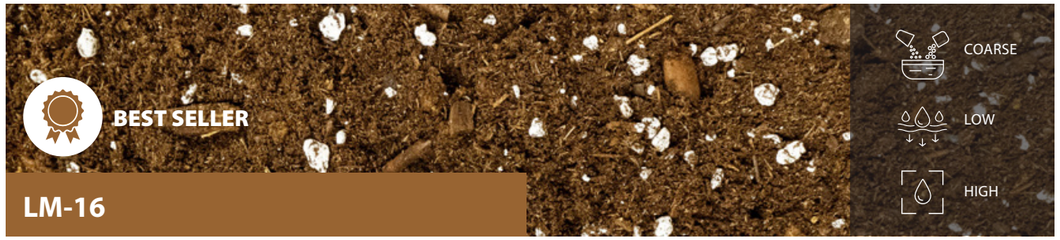

LM-8 Peat & Bark Mix is a blend of coarse Canadian sphagnum peat moss with aged bark and coarse perlite. This mix is ideal for use in large container, perennials, hardy mums, and nursery production. LM-8 is excellent for growers who want a substrate that provides weight for containers.

Uses: Nursery crops, bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes

Product Features: Overhead irrigation, heavyweight, increases pot stability, pre-moistened, ready to use

Components:
- Canadian sphagnum peat moss (60 - 70%)
- Aged bark
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2385	2.8 cu ft loose fill - 79 L	42 bags
664980 2386	70 cu ft loose fill - 1982.18 L	2 totes

LM-16

LM-16 growing medium is composed of coarse fiber Canadian sphagnum peat moss, a high percentage of aged bark and coarse perlite. LM-16 is ideal for use in large containers, perennials, hardy mums, and nursery production. LM-16 is excellent for growers who want a substrate that provides extra weight for containers.

Uses: Nursery crops, bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes

Product Features: Overhead irrigation, heavyweight, increases pot stability, pre-moistened, ready to use

Components:
- Canadian sphagnum peat moss (45 - 55%)
- Aged bark
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

GFM
The Green Formula Substrates

Peat Grade:
0 - 20 mm

Lambert GFM High Porosity Growing Media is designed for crops that require higher air capacity and drainage. The GFM All Purpose Mix is versatile and suitable for growing several productions.

The GFM Peat & Coconut Coir Substrates are designed to provide fast growing crops with healthy roots and vigorous plants. A mixture that ensures maximum air porosity, superior drainage and ideal water retention.

GFM High Porosity Growing Media

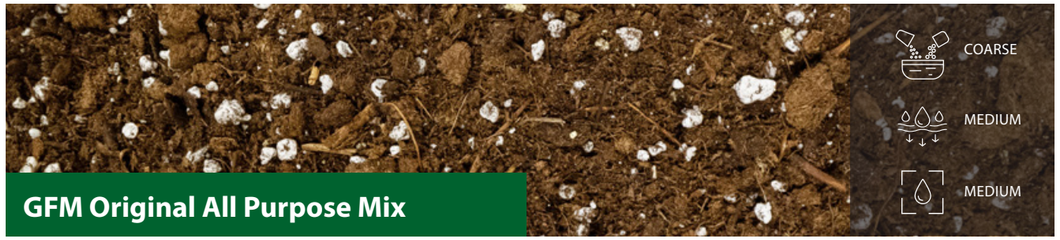

The Green High Formula Porosity Mix is a high porosity growing substrate with long-fibered Canadian sphagnum peat moss including the addition of large peat chunks and coarse perlite. Specially designed for crops that require higher air capacity and drainage. GFM – High Porosity mix is recommended for the production of cactus and succulents in pots of 4 inches and less.

Uses: Bedding plants, flowering plants, foliage crops, interiorscapes, hydroponics

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:
- Long-fibered Canadian sphagnum peat moss and large peat chuncks (75 - 85%)
- Coarse horticultural perlite
- Calcitic limestone
- Dolomitic limestone
- Wetting agent
- Starter charge

Product Code	Size	Qty /Pallet
664980 2270	2.8 cu ft loose fill - 79 L	48 bags

GFM Original All Purpose Mix

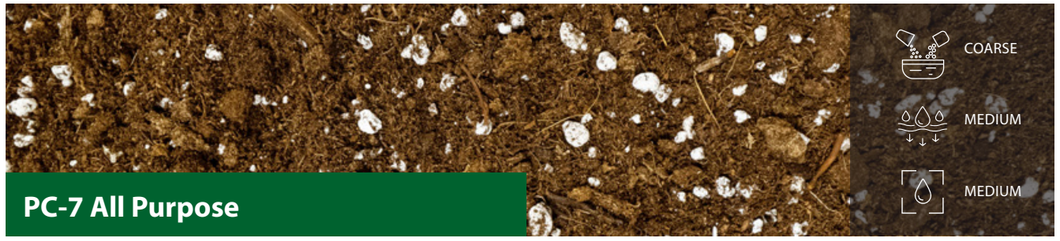

GFM Original All-Purpose Mix is composed of coarse Canadian sphagnum peat moss, coarse perlite and coarse vermiculite. GFM Original All-Purpose Mix can be used straight from the bag for all general-purpose planting needs.

Uses: All purpose, bedding plants. flowering plants, hanging baskets, foliage, cuttings, interiorscapes

Product Features: Versatile, good for mums, good for poinsettias, subirrigation, overhead irrigation

Components:
- Coarse Canadian sphagnum peat moss (80 - 90%)
- Coarse horticultural perlite
- Coarse horticultural vermiculite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

PC-7 All Purpose

The Green Formula PC-7 All Purpose Peat & Coir Mix is composed of Canadian sphagnum peat moss, coconut coir and coarse perlite. GFMPC-7 All Purpose is ideal for plants that require higher water retention. Perfectly suitable for outdoor crops grown in containers.

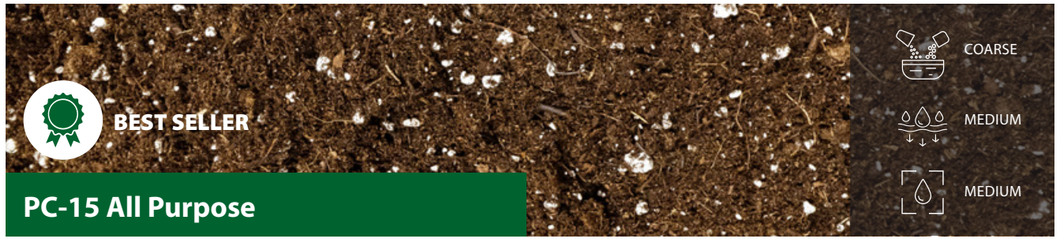

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation, outdoor containers

Product Features: Sub-irrigation, overhead irrigation

Components:

- Coarse Canadian sphagnum peat moss (65 - 75%)
- Coconut coir
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

PC-15 All Purpose

The Green Formula PC-15 All Purpose Peat & Coir Mix is composed of coarse Canadian sphagnum peat moss, coconut coir and coarse perlite. GFM-PC-15 All Purpose is the perfect substrate that combines the physical properties of our biggest seller LM-111 with the added benefit of coir.

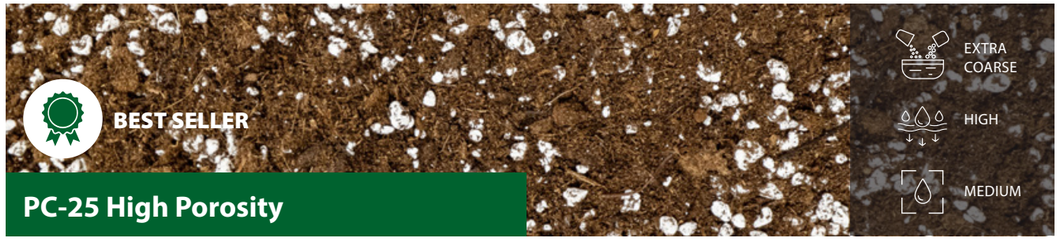

Uses: Bedding plants, flowering plants, hanging baskets, foliage crops, interiorscapes, large-celled vegetable and fruit plant propagation

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:

- Coarse Canadian sphagnum peat moss (65 - 75%)
- Coconut coir
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

PC-25 High Porosity

The Green Formula PC-25 All Purpose Peat & Coir Mix is made of extra coarse Canadian sphagnum peat moss, coconut coir and coarse perlite. GFM-PC-25 is designed to provide an excellent ratio of drainage, air porosity and water retention.

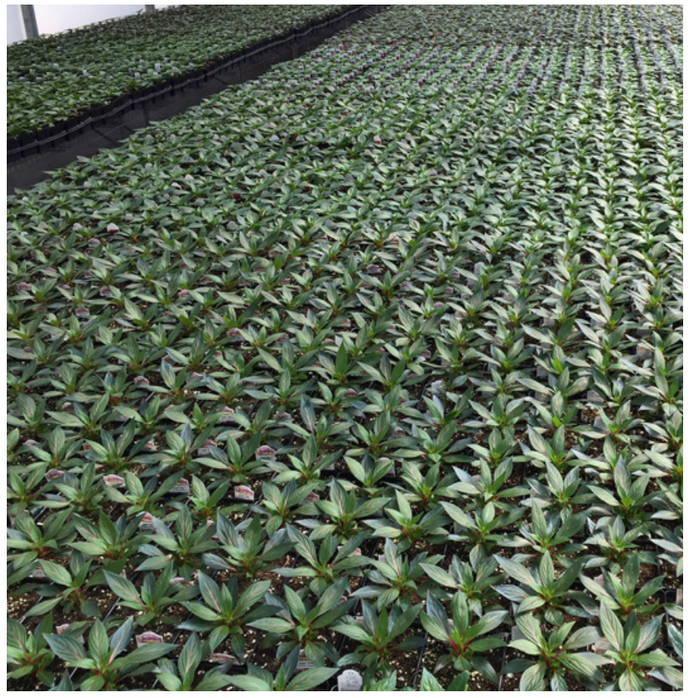

Uses: Bedding plants, flowering plants, foliage crops, interiorscapes, hydroponics

Product Features: Lightweight, sub-irrigation, overhead irrigation

Components:

- Long-Fibered Canadian sphagnum peat moss and large peat chunk (50-60%)
- Coconut coir
- Coarse horticultural perlite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Lambert's Custom Blend Substrates

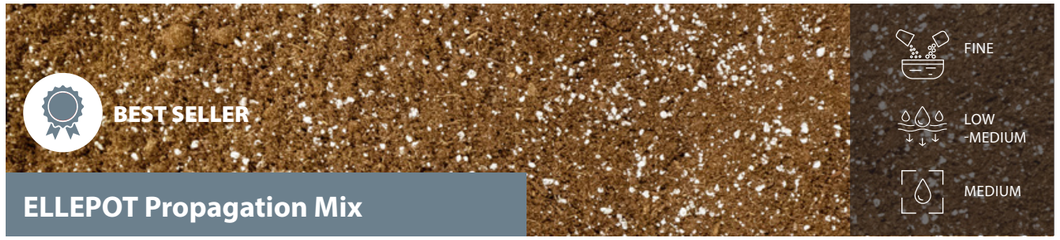

CERTIFIED

OMRI LISTED

Lambert Professional Custom Blend Peat-Based Substrates are formulated from selected Canadian sphagnum peat moss and offer growers endless possibilities to conceive exclusive mixes according with their preferences and specifications.

We custom blend!

LM-CB

ELLEPOT Propagation Mix

Ellepot Propagation Mix is specially designed to produce **15-35mm plugs on an Ellepot machine**. It is composed of Canadian sphagnum peat moss and **fine perlite***. The special screening of the peat reduces the risk of the presence of harmful sticks. Ellepot Propagation Mix has an excellent air-water ratio. ***Propagation substrate options for Ellepot with fine horticultural perlite: It can be mixed with a rate of 10%, 15%, 20% or 25% of fine horticultural perlite.***
Mix particule size distribution: Fine with extra screening step

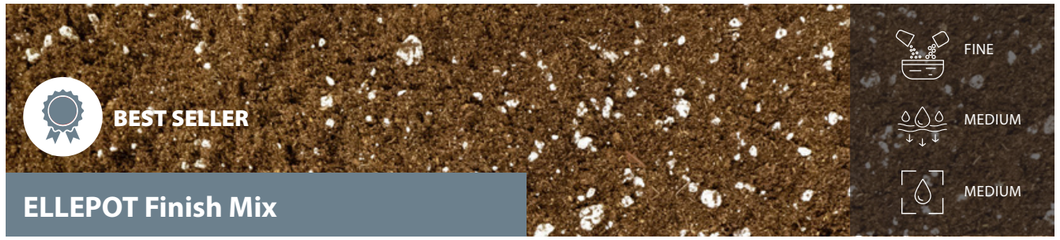

Uses: Smaller Ellepot sizes (15-35mm)

Product Features: Very economical, stick-free, sub-irrigation, overhead irrigation

Components:
- Medium Canadian sphagnum peat moss (70 - 95%)
- Fine horticultural perlite with a rate of 10%, 15%, 20% or 25%
- Calcitic and Dolomitic limestone
- Wetting agent and Starter charge

Peat Grade: 0 - 10 mm

Size	Qty /Pallet
3.0 cu ft loose fill - 85 L	48 bags
74 cu ft loose fill - 2095 L	2 totes
3.8 cu ft compressed - 107 L	30 bales
55 cu ft compressed - 1557 L	2 bales
110 cu ft compressed - 3116 L	1 bale
120 cu ft compressed - 3400 L	1 bale

ELLEPOT Finish Mix

All Purpose Ellepot Finish Mix is specially designed to produce **plugs 35mm or larger on an Ellepot machine.** It is a blend of Canadian sphagnum peat moss and **coarse perlite***. The coarse peat is screened with careful attention to reduce sticks in the media for Ellepot production. ***All purpose substrate options for Ellepot with horticultural coarse perlite: It can be mixed with a rate of 10%, 15%, 20% or 25% of coarse horticultural perlite.***
Mix particule size distribution: Fine with extra screening step

Uses: Larger Ellepot sizes 35 mm and more

Product Features: Very economical, stick-free, sub-irrigation, overhead irrigation

Components:
- Coarse Canadian sphagnum peat moss (70 - 95%)
- Coarse horticultural perlite with a rate of 10%, 15%, 20% or 25%
- Calcitic and Dolomitic limestone
- Wetting agent and Starter charge

Peat Grade: 0 - 10 mm

Size	Qty /Pallet
3.0 cu ft loose fill - 85 L	48 bags
74 cu ft loose fill - 2095 L	2 totes
3.8 cu ft compressed - 107 L	30 bales
55 cu ft compressed - 1557 L	2 bales
110 cu ft compressed - 3116 L	1 bale
120 cu ft compressed - 3400 L	1 bale

The Nursery Mix

The Nursery Mix is perfect for growing trees and shrubs in large containers. The coarse structure of this mix allows excellent drainage of excess water while maintaining proper water retention. The perfect ratio! Due to the components (Peat Moss & EcoPeatPlus+), you will see very minimal shrinkage of The Nursery Mix in the containers.

Uses: Nursery stocks, large container productions

Product Features: Minimal shrinkage, increase pot stability, overhead irrigation

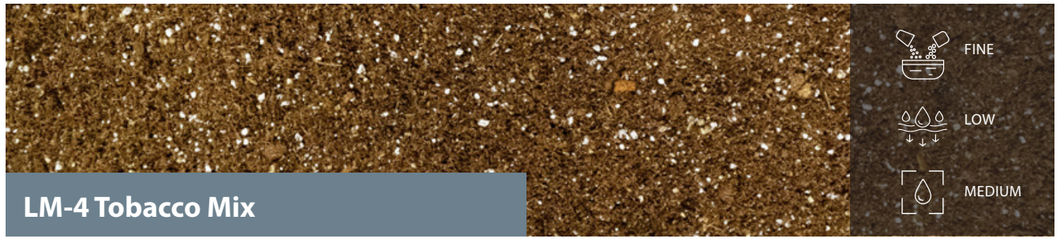

Components:

- Extra Coarse Canadian sphagum peat moss mixed with ECOPEAT PLUS+ (100%)
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Aggregate Free Media

Peat Grade: 0 - 20 mm

Product Code	Size	Qty /Pallet
664980 2401	74 cu ft loose fill - 2095 L	2 totes
664980 2402	110 cu ft compressed - 3116 L	1 bale

LM-4 Tobacco Mix

LM-4 Tobacco Mix is made of fine-fibered blond Canadian sphagnum peat moss blended with fine perlite and vermiculite. LM-4 ensures excellent water retention for optimal and uniform germination. Moisture is just right for ease of flat filling.

Uses: Specially formulated for tobacco seed germination, seed germination, plugs, cutting propagation

Product Features: Excellent for tobacco, floating bed, overhead irrigation

Components:

- Fine Canadian sphagnum peat moss (80 - 90%)
- Fine horticultural perlite
- Fine horticultural vermiculite
- Calcitic and Dolomitic limestone
- Wetting agent
- Starter charge

Peat Grade: 0 - 7 mm

Product Code	Size	Qty /Pallet
664980 2345	3.0 cu ft loose fill - 85 L	48 bags
664980 2346	74 cu ft loose fill - 2095 L	2 totes
664980 2340	3.8 cu ft compressed - 107 L	30 bales
664980 2342	55 cu ft compressed - 1557 L	2 bales
664980 2341	110 cu ft compressed - 3116 L	1 bale
664980 2347	120 cu ft compressed - 3400 L	1 bale

ECOPEAT PLUS+®

EXCLUSIVE TO LAMBERT PEAT MOSS

ECOPEATPLUS+® is a highly fibrous "natural wood" fiber, collected from our peat bog and specially processed in our facilities. **ECOPEATPLUS+®** is used as a natural aggregate and added to our sphagnum peat moss to produce premium quality professional substrates with an exceptional ratio of air porosity and water holding capacity.

- Provides excellent air space.
- Great porosity for a better drainage.
- Drains excess water quickly, so the soil stays moist, not damp.
- Consistent media with minimum shrinkage and breakdown over time.
- Unlike bark, EcoPeatPlus+® retains its physical structure for many months in containers.
- Enhances plant performance with its application in mostly all crops.
- Sustainable practice that increases the longivity of a peat bog. Environmentally Friendly!
- From a natural environment, so non-toxic and no risk of heavy metals contained at the source.
- Great for nursery crops, adds good weight and stability for large container productions.
- Exceeds grower's expectations.

**" GROWER FRIENDLY!
VERY FORGIVING MIXES! "**

Lambert Peat Moss Professional EPM Substrates

Add it to your favorite mix

Length: 0 - 30 mm
Density: 0.08-0.12 g/c
